

Object Oriented Programming with Python

Gramsci Hermozo

Session 21

- Add unittest:
 - Add Unittest for Data Collector API
- Add error handling
- Create a person/patients from Console UI
- Implement Bank user registration

Unittest for Data Collector API

Posible responses from API

- 200 - OK
- 400 - Bad Request
- 404 - Not Found
- 408 - Request Timeout
- 500 - Internal Server Error
- 501 - Not Implemented
- 503 - Service Unavailable

Create a patient from Console UI

- Add logic into the Console UI module to allow the user add a patient from console.
- Where the unittest for this new implementation should go.
